

Intended Learning Outcomes

This programme will help students to discover how to integrate employees' health and safety into daily operation and decision making, save organization resources and contribute to enhance employees' work performance.

Upon completion of the whole programme, students should:

1. Understand key concepts of occupational health and work-related diseases.
2. Identify and analyze health hazards in the workplace and develop an occupational health program.
3. Enhance their personal and professional development in occupational health, safety & hygiene practice.

Professional Recognition

- GCP provides well-structured occupational health and safety training program with Site Visit and MCQ Examination.
- Nurses who complete the programme can apply for 46.5 CNE points or equivalent from The Nursing Council of Hong Kong and the programmed is considered structured specialty training consistent with the core competency of Fellow of The Hong Kong Academy of Nursing & Midwifery (Community & Public Health-Occupational Health).
- In addition, it is also useful for all safety officers and managers who are interested in furthering study in occupational hygiene and health practices in the operation of their enterprises.
